

**Subject:** Personal Menu ...  
**From:** Wi-Fi@HisKids.net

---

I'm writing to share exciting news about your HisKids.net Wi-Fi Family Radio. In addition to being safe for kids, it's now more flexible for the entire family!

If operating with upgraded firmware, perhaps you've noticed the menu on your Wi-Fi Family Radio contains a category for HisKids.net, Parents and a Personal Menu that's fully-customizable from our web site.

To log in and add your own channels to this menu, visit [www.HisKids.net/solutions](http://www.HisKids.net/solutions) and click the link to EDIT PERSONAL MENU & MANAGE ACCOUNT.

Your username is the Reciva Serial Number located on the bottom of your radio and inside the Configure Menu. The first time you visit, you'll use the same Reciva Serial Number as your password, but we encourage you to change your password as soon as possible to protect your menu and other account information (name, address, email address, etc).

Please note that if you've given the HisKids.net Wi-Fi Family Radio as a gift, we'd ask that you forward this email to the listening family and invite them to log in and provide their own contact info so we can keep them up to date regarding further enhancements.

Feel free to contact me personally with any questions you may have!
